

Mijail Littin, PhD

Computational methods for inverse problems in physical systems. Current direction:
scientific machine learning for physics-constrained inference.

mijaillittin@icloud.com · ORCID 0000-0002-5577-5060 · Scopus 58550141200

1 Current appointment

2026– **Adjunct instructor (profesor de cátedra)**, Department of Industrial Engineering, Universidad Técnica Federico Santa María (UTFSM), Chile. Four undergraduate courses (see Teaching).

2 Previous positions

2022–2025 **Doctoral researcher**, CORIA laboratory (UMR 6614 CNRS), INSA Rouen Normandie, France. RIN doctoral fellowship, Normandy Region. Collaboration with SAFRAN within the doctorate (2023–2025).

2020–2022 **Research assistant** (MSc student), Energy Conversion and Combustion Group (EC2G), UTFSM. ANID–NSFC and FONDECYT projects.

3 Education

2025 **PhD**, Normandie Université / INSA Rouen Normandie, France. Doctoral school PSIME, CORIA laboratory. Thesis: *Characterization of soot properties in laminar diffusion flames by coupling optical techniques: application to sustainable aeronautic fuels*. Defended 11 December 2025. Supervisors: J. Yon, A. Fuentes.

2024 **MSc in Industrial Engineering Sciences**, UTFSM, Chile. Thesis on soot formation in a jet-fuel laminar flame with an extended HyChem mechanism. Grade 100/100, highest distinction.

2024 **Industrial Civil Engineer**, UTFSM, Chile. Grade 100/100, highest distinction.

2020 **Licentiate in Industrial Engineering Sciences**, UTFSM, Chile.

4 Research

Inference of latent physical quantities from indirect, incomplete and noisy observations by combining physical models and data. Regularised reconstruction of ill-posed problems, including axisymmetric tomography; joint inversion of

several measurement modalities with physics-informed neural networks. In progress: uncertainty quantification in neural inversion. Proposed: identifiability and surrogate models of physical operators. Application and validation contexts: energy, combustion, thermal radiation, optical diagnostics, aerosols.

19 journal articles published or in press and 2 accepted; 7 as first author; 5 based on neural networks or machine learning. 29 conference, workshop and meeting contributions.

5 Teaching

2026-2	Design and Optimization of Thermal Systems (ILN223) , UTFSM. Diseño y Optimización de Sistemas Térmicos.
2026	Energy Management II (Heat and Mass Transfer) (ILN222) , UTFSM. Gestión Energética II (Transferencia de Calor y Masa).
2026	Energy Management I (Fluid Mechanics) (ILN221) , UTFSM. Gestión Energética I (Mecánica de Fluidos).
2026-1	Introduction to Energy Project Management (ICN367) , UTFSM. Introducción a la Gestión de Proyectos Energéticos.
2023–2025	INSA Rouen Normandie, France. Laboratory and tutorial classes in electricity, geometrical optics and wave optics (2024–2025), energy and fluids (2023–2024), and supervised student science projects (2023–2025).
2019–2022	UTFSM, Chile. Teaching assistant for graduate-level Optimization (2019–2022), Operations Research (2020), Operations Management II (2021), Fluid Mechanics (2019–2022) and Differential Calculus (2019).
2017–2018	Universidad Andrés Bello, Chile. Teaching assistant for Differential and Integral Calculus.

6 Projects

Participation in externally funded projects, without a principal-investigator role.

2025–2027	ECOS–ANID ECOS240010, DATINV: data inversion for in situ soot metrology, conventional vs neural networks. PI F. Escudero (UTFSM); French counterpart J. Yon (INSA Rouen). Co-author of the proposal, prepared and managed from the French side (2024); work on neural-network inversion.
2026	FONDECYT Regular (ANID) , PI R. Demarco, and FONDECYT de Iniciación (ANID) , PI F. Escudero. Technical support in optical diagnostics and inversion models.

- 2020–2022 **ANID–NSFC** (Chile–China): revealing soot chemistry evolution in the combustion of biofuels for jet applications. PI A. Fuentes. Research assistant.
- 2021–2022 **FONDECYT**: soot production from liquid fuels in laminar diffusion flames, application to gasoline surrogates. PI R. Demarco. Research assistant.

7 Awards and fellowships

- 2025 **Prix Jean Bricard**, Association Française d’Études et de Recherches sur les Aérosols (ASFERA), for doctoral work in aerosol science.
- 2022–2025 RIN doctoral fellowship, Normandy Region, France.
- 2022 Scientific initiation programme (PIIC), UTFSM.
- 2020–2024 Graduate tuition scholarship (2020–2024) and maintenance scholarship (2020–2022), UTFSM, for academic merit.

9 Service

- Reviewer for *Journal of Aerosol Science, Combustion Science and Technology, Journal of Quantitative Spectroscopy and Radiative Transfer, International Journal of Heat and Mass Transfer* and *Fuel*.
- Co-organiser, Asia-Pacific Combustion Institute Summer School, UTFSM (2022 and 2025).
- Academic consulting for Lipigas, GASCO and Copec through UTFSM (2020–2025).
- Member of The Combustion Institute and ASFERA.

10 Software and tools

- **pysat-abel**: Python implementation of the spline-based Abel transform (Fuel, 2024), on PyPI since 2024.
- Programming and machine learning: Python (NumPy, SciPy), JAX, PyTorch; MATLAB, Julia, Fortran, R.
- Simulation: CoFlame (laminar reacting flows), Cantera (chemical kinetics), radiative transfer and light-scattering models.
